Baby's First Year Package

Your baby's first year is the fastest and biggest growth year. Their looks are constantly changing. This is your opportunity to capture those precious moments for a lifetime. Now is the only time you can do it. This package is designed to capture all those special memories from new born through the first year of life. Once they grow up, it's too late!!!

Sessions

The first photo session occurs once the precious bundle is here, during the first 10 days of life. The sooner the better! The majority of the shoot is of the baby, but if Mom and Dad would like to join in, that is great too!

The next three shoots happen when the baby is 4, 8, and 12 months old. These shoots are for the baby only since it begins to get more difficult to get the best shots. We want to make sure to have our full focus on the baby to get all those wonderful expressions.

All these sittings are held at the studio. After each session an ordering appointment is made for approximately a week later. There you will pick one Image for your 8x10, as well as the option to order additional prints.

*Include a
complimentary
maternity session
with all
packages*
